## Why to use C?

C was initially used for system development work, in particular the programs that make up the operating system. C was adopted as a system development language because it produces code that runs nearly as fast as code written in assembly language. Some examples of the use of C might be

: Operating Systems

- Language Compilers
- Assemblers

→ • Text Editors

→ • Print Spoolers

→ • Network Drivers

→ • Modern Programs

→ • Databases

→ • Language Interpreters
