

```
#include <stdio.h>
#include <conio.h>
int main()
{
    int ctr, num, n, big, nextnum;
    printf("Input n");
    scanf("%d", &n);
    printf("Enter num\n");
    scanf("%d", &num);
    big = num;
    ctr = ctr + 1;
    while(ctr < n)
    {
        printf("Enter nextnum");
        scanf("%d", &nextnum);
        ctr = ctr + 1;
        if(nextnum > big)
            big = nextnum;
    }
    printf("Greatest Number", big);
    getch();
    return 0;
}
```
