Printf() and Scanf()

The printf() is a predefined function which displays the output on to the screen and scanf() is an input accepting predefined function. Both printf() and scanf() are included in the "stdio.h" library.

Example of printf()

```
#include <stdio.h>
int main()
{
    // Displays the string inside quotations
    printf("C Programming");
    return 0;
}
```
