

aryan anshu pankaj kumar kaundilya Aditya krianshika64611 md arbaz khan

variable, a unary or binary expression, an arithmetic expression, or the return value from a function call.

The statement can be a simple or compound statement. A compound statement in a while statement appears as:

```

while (condition)
{
    statement1;
    statement2;
}

```

Example:

```

int main()
{
    int j = 1;
    while (j <= 10)
    {
        printf("%d\n", j);
        j++;
    }
}

```

for(j=1;j<=10;j++)

1 2 3 4 5 6 7 8 9 10
