Example

The following program that allows the user to enter the RGB codes into three different textboxes and when clicks the display color button, the background color of the form will change according to the RGB codes. So, this program allows users to change the color properties of the form at run time.

Solution:

```
Private Sub Command1_click()
Dim rgb1, rgb2, rgb3 As Integer
rgb1 = Val(Text1.Text)
rgb2 = Val(Text2.Text)
rgb3 = Val(Text3.Text)
Form1.BackColor = RGB(rgb1, rgb2, rgb3)
End Sub
```

textbox

Chat
