

Shishir Kumar Host, me ↑	mohitt	ranjan kumar	Sonali Kumari	Ajit Rana
--------------------------------	--------	--------------	---------------	-----------

find command is used to search specific pattern in existing file.
it is case sensitive command i.e. it checks uppercase or lowercase pattern in a file.

```
FIND "string" pathname
find and display lines containing string in file
/v - lines NOT containing string
/c - count lines only
/n - display line numbers also
```
